

EFFECT_SHAKE	datastream composition	special packets	sync	cascades	
	0 - existing board state (colors/shapes) retained and repositioned	0 - retain special packet overlays	0 - prevent sync after shake	0 - no cascades after sync	
	1 - non-special packets randomized	1 - remove special packet overlays	1 - allow sync after shake	1 - cascades up to cascade limit	
				2 - unlimited cascades	
EFFECT_LINESLICE	dimension	targeting	special packets retention (retained packets with vertical space below them fall normally)	deal damage	gain charge
	0 - row	0 - random packet (not already sliced by current function activation)	0 - destroy	0 - sliced row deals damage according to activating user's c/s profile	0 - sliced packets in target row charge
	1 - column	1 - targeted packet (not already sliced by current function activation)	1 - retain all	1 - no damage	1 - no charge
			2 - retain only activating user specials		
EFFECT_BOMB	targeteting	deal damage	gain charge		
	0 - random	0 - sliced packets deal damage	0 - sliced packets charge		
	1 - targeted	1 - no damage	1 - no charge		
EFFECT_TRANSFORM	targeting	special packet treatment			
	0 - random	0 - destroy			
	1 - targeted	1 - retain all			
		2 - retain only for activating user
